1. Maintain proper tire inflation pressure. Do not underinflate or overinflate your tires. Always maintain inflation pressure according to the vehicle manufacturer's recommendations or the tire manufacturer's specifications.
2. Check wheel alignment and tire balance regularly to help ensure proper handling, performance, and even tread wear.
3. Do not overload your vehicle. Refer to the tire sidewall markings for the tire's maximum load-carrying capacity.
4. Avoid excessive tire spinning & impacts with curbs, potholes, obstacles, pavement edges.
5. Never drive on worn-out (bald) tires. By law, tires must be replaced when the tread reaches the Tread Wear Indicator (TWI).
6. Inspect your tires regularly for signs of damage, including cuts, abrasions, punctures, foreign objects, separations, or bulges. If damage is found, replace the tire with the spare tire (if available) and consult an authorized tire dealer.
7. Do not exceed posted speed limits or the maximum speed rating specified for the tire.
8. To promote even wear and maximize tread life, rotate your tires at least every 6,000 miles (10,000 km) or according to the vehicle manufacturer's recommendations.
